

## Solstice Special Edition Power Supply

Solstice Special Edition is the first turntable in Naim Audio's almost 50-year history. Lovers of the organic authenticity of vinyl can now enjoy it with the musical purity and passion only a Naim system can deliver. Limited to just 500 units, this Special Edition includes the Solstice turntable, a next-generation version of the iconic Naim Aro tonearm, an Equinox MC cartridge, Solstice Series Phono Stage, Power Supply and bespoke accessories set.

The Solstice Series Power Supply is a bespoke design that powers both the turntable and the phono stage. For the ultimate performance, these two different power supplies are completely isolated, with no risk of interference.

Raising the game (and lowering unwanted noise) even further, the turntable power supply - like the Solstice Phono Stage - features Naim DR technology, providing the cleanest possible power. Clean power is a key component of any audio system, but it's even more vital in a turntable set-up, where the cartridge is incredibly sensitive to interference from electromagnetic radiation.

This Solstice design has another trick up its aluminium sleeve. It's also a smart power supply, which can detect the turntable has stopped and go into a 0.5W power sleep mode for standby. A small switched-mode power supply (SMPSU) enables this standby function, which is automatically disengaged when the turntable is in use - when an oversized toroidal transformer takes over power duties.

# Solstice Special Edition Power Supply

Parameter	Solstice Series Power Supply DR regulated linear power supply
Model Code	NPX TT
Standby Power Consumption	<0.5W
Other Connectors	Mini USB (update only)
Front Panel	Clear Acrylic
Naim Logo	White illuminated
Logo Brightness setting	Button - High, Medium, Low
Mains Supply	110 to 120V and 220 to 240Vac
Dimensions (H x W x D)	70mm x 214mm x 330mm
Weight	5.6kg
